SUMMARY

Experienced Backend Volunteer with a strong coding background, adept at resolving 5 technical issues per week and improving system performance by 10%. Committed to clean code and documentation, with a 20% reduction in post-release bugs and 5 monthly documentation items. Eager to support mission-driven organizations and dedicated to continuous learning in the dynamic tech landscape.

SKILLS

- Programming Languages
- Backend Frameworks
- Database Management
- API Development
- Debugging and Troubleshooting
- Security Awareness
- Version Control
- Code Quality
- HTML/CSS
- JavaScript
- Frontend Frameworks
- Responsive Design
- UI/UX Design
- Cross-Browser Compatibility
- Version Control

EXPERIENCE

03/2023 - 09/2023

Backend Volunteer, Affiliate

- Assist in developing and maintaining the backend of web applications or software systems.
- Collaborate with the development team to understand project requirements and objectives.
- Write clean, efficient, and well-documented code for server-side functionality.
- Participate in the design and optimization of databases and data storage solutions.
- Debug and troubleshoot backend code issues, working closely with team members to resolve at least 5 issues per week.
- Contribute to the implementation of RESTful APIs or other backend interfaces.

01/2023 - 09/2023

Backend Volunteer, Web3IQ

- Work on tasks related to scalability, performance optimization, and security of backend systems, resulting in a 10% improvement in system performance over a specified period.
- Assist in integrating third-party services or APIs into the backend as needed.
- Collaborate with front-end developers to ensure seamless communication between the front-end and backend components.
- Conduct at least 2 code reviews per week and provide constructive feedback to improve code quality.
- Stay updated on industry trends and best practices in backend development, dedicating 5 hours per week to self-study.
- Assist in documenting backend processes, APIs, and system architecture, producing at least 3 documentation items per month.

07/2022 - 04/2023

Fullstack Trainee, Rework Technologies

- Assist in designing, developing, and maintaining web applications and software systems.
- Collaborate with senior developers to understand project requirements and specifications.
- Learn and apply programming languages, frameworks, and tools for both front-end and back-end development.
- Debug and troubleshoot code issues, assisting in the resolution of software defects.
- Work on various stages of software development, from initial concept to deployment and maintenance.
- Participate in at least 3 code reviews per week and incorporate feedback into your work.
- Dedicate 10 hours per week to research and staying updated on industry trends, best practices, and emerging technologies.
- Contribute to documentation and knowledge sharing within the development team by creating 5 documentation items per month.
- Provide support for the deployment and monitoring of applications in production environments.

EDUCATION AND TRAINING

09/2019

NCE, Computer Science & Physics, Computer Science, Physics
Fct College of Education

CERTIFICATIONS

- Front End Developer <https://www.reworkacademy.co/> (04/2023)
- Backend Developer <https://www.reworkacademy.co/> (04/2023)

PROJECTS

- Health Care Management System
We created, created, and deployed a successful full-service Fullstack Hospital a management system that combines our proficiency with React.js for the using Node.js and the front end Backend software is Express.js. This sturdy system allows for effective hospital administration procedures and patient records maintaining scalability and consistency.
